· Precautionary statements
Obtain special instructions before use.
Do not handle until all safety precautions have been read and understood.
Keep away from heat/sparks/open flames/hot surfaces No smoking.
Keep container tightly closed.
Ground/bond container and receiving equipment.
Use explosion-proof electrical/ventilating/lighting/equipment.
Use only non-sparking tools.
Take precautionary measures against static discharge.
Wash thoroughly after handling.
Wear protective gloves/protective clothing/eye protection/face protection.
If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower.
If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do.
Continue rinsing.
IF exposed or concerned: Get medical advice/attention.
If eye irritation persists: Get medical advice/attention.
In case of fire: Use for extinction: CO2, powder or water spray.
Store in a well-ventilated place. Keep cool.
Store locked up.
Dispose of contents/container in accordance with local/regional/national/international regulations.
Classification system:
· NFPA ratings (scale 0 - 4)
$\begin{array}{c} 2 \\ 2 \\ 2 \\ 0 \end{array} \begin{array}{c} Health = 2 \\ Fire = 2 \\ Reactivity = 0 \end{array}$
· HMIS-ratings (scale 0 - 4)
HEALTH ¹² Health = $*2$
FIRE 2 $Fire = 2$
REACTIVITY O $Reactivity = 0$
• Other hazards
· Results of PBT and vPvB assessment
• <i>PBT</i> : Not applicable.
• vPvB: Not applicable.
3 Composition/information on ingredients
· Chemical characterization: Mixtures
• Description: Mixture of the substances listed below with nonhazardous additions.
· Dangerous components:
7757-83-7 sodium sulphite 1–5%

4 First-aid measures

• Description of first aid measures

- General information: Immediately remove any clothing soiled by the product.
- After inhalation: Supply fresh air; consult doctor in case of complaints.
- After skin contact: Immediately rinse with water.

• Trade name: amino acid reagent for phosphorus reactive

• After eye contact:

- Rinse opened eye for several minutes under running water. If symptoms persist, consult a doctor.
- After swallowing: If symptoms persist consult doctor.
- · Information for doctor:
- Most important symptoms and effects, both acute and delayed No further relevant information available.
- · Indication of any immediate medical attention and special treatment needed
- No further relevant information available.

5 *Fire-fighting measures*

- · Extinguishing media
- Suitable extinguishing agents:
- CO2, extinguishing powder or water spray. Fight larger fires with water spray or alcohol resistant foam.
- Special hazards arising from the substance or mixture No further relevant information available.
- Advice for firefighters
- · Protective equipment: No special measures required.

6 Accidental release measures

	recautions, protective equipment and emergency procedures	
	ective equipment. Keep unprotected persons away.	
	ental precautions: a plenty of water.	
	ow to enter sewers/ surface or ground water.	
	nd material for containment and cleaning up: h liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).	
	n inquia-binaing material (sana, alatomite, acta binaers, universal binaers, sawausi). ntaminated material as waste according to item 13.	
	equate ventilation.	
	<i>to other sections</i> 17 for information on safe handling.	
	<i>i 8 for information on personal protection equipment.</i>	
	1 3 for disposal information.	
	Action Criteria for Chemicals	
• PAC-1:		
68-12-2	N,N-dimethylformamide	2 ppm
7757-83-7	sodium sulphite	11 mg/m ³
· PAC-2:		
68-12-2	N,N-dimethylformamide	91 ppm
7757-83-7	sodium sulphite	120 mg/m ³
· PAC-3:		
68-12-2	N,N-dimethylformamide	530 ppm
7757-83-7	sodium sulphite	710 mg/m ³

7 Handling and storage

- · Handling:
- · Precautions for safe handling Open and handle receptacle with care.
- · Information about protection against explosions and fires:

Keep ignition sources away - Do not smoke.

· Protection of hands:

Protective gloves

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation. Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation · *Material of gloves*

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

· Penetration time of glove material

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
